About me

Graduated in Biological Sciences, Master's in Animal Biology (UFRGS) and Ph.D in Zoology (PUCRS - Sandwich Doctorate in Wallis-UK). I currently work as a post-doc fellow in Ecology on Post Graduation Program in Ecology (UFSC). I have experience in aquatic ecology with emphasis in invertebrates, fishes, spatial models, and niche models. Also, I developed throughout my career programming skills using the **R software** in my research field, which enhanced my scientific thinking and influenced the way I teach in my lectures. My teaching experience is in postgraduation level, ranging from statistics and ecological practices in field ecology.

Skills & Interests

My background is in biological sciences, with emphasis in zoology and ecology. As a post-doc fellow I was encouraged to teach along five years and this experience gave me selfconfidence in class. The English idiom is part of my routine as a post-doc fellow, mainly for scientific reading and writing. My english speaking skills improved in 2019 when I was one of the lectures in a course entirely taught in English at UFSC. I consider myself fluent in English in most situations, also believe there is always room for improvement. I believe I can contribute and grow professionally at EIF.
